

## • 5.11 Environmental Policy

### Scope:

The company's scope is for the stockholding, manufacturing, supply, installation, design, development and refurbishment of industrial rotating equipment, associated products and services.

### Purpose:

The company is fully committed to the continual improvement and review of all aspects of the Environmental Management System through established processes to ensure consistent environmental preservation and conservation principles throughout all product and service offerings to minimize and control the impacts of any activities on the environment and ensure conformance to applicable standards and legislative requirements.

### Declaration:

1. The company's over-riding philosophy is to put the environment first by incorporating environmentally friendly practices into our core business strategies and management processes such as sustainable resource usage, climate change mitigation/adaptation and to foster the initiation and ownership of environmentally friendly activities such as ensuring life cycle requirements are obtainable, the protection of biodiversity and ecosystems thereby building a strong environmentally aware business culture.
2. We are fully committed to the on-going compliance, maintenance and continual improvement of an efficient and effective Environmental Management System based upon the latest ISO 14001 Standard from where we apply the principles of cleaner production within our operations, products, processes, waste and packaging which we monitor and minimize to prevent pollution as far as practically possible thereby ensuring that environmental requirements are met in full and are consistently high.
3. We communicate, provide training and create awareness to continually improve the development of our corporate culture which is to always act in an environmentally responsible manner by sourcing, promoting products and services to minimize environmental impacts of both distribution and production. We monitor, measure, control and minimize as far as practicably any possible waste, greenhouse and toxic gas emissions generated by our activities and actively promote recycling both internally and externally including the responsible use of water and energy.
4. Our management team establishes, monitors at frequent intervals, reviews and communicates our environmental objectives and targets to all interested parties in keeping with this policy statement and maintaining their pertinence to our current business requirements.
5. We meet or exceed State, Federal and other compliance obligations that is applicable to the company including other initiatives to which we subscribe such as industry specific standards and specifications.
