

• 5.12 Health and Safety Policy

Scope:

The company's scope is for the stockholding, manufacturing, supply, installation, design, development and refurbishment of industrial rotating equipment, associated products and services.

Purpose:

The company is fully committed to the continual improvement and review of all aspects of the Health and Safety Management System through established processes in order to ensure control and safeguarding, as far as reasonably practical, the Health and Safety of all employees, visitors, sub-contractors and other interested parties that may be affected by the company's activities, risks and hazards and in addition to ensure conformance to applicable standards and legislative requirements.

Declaration:

1. The company's prevailing philosophy is to enhance the health and ensure the safety of all interested parties. The company endeavours to create a safe working environment, operate safe equipment, promote safe working practices and conditions and provide facilities for welfare into the core business strategies and management processes to foster the initiation and ownership of health and safety awareness in all activities in all areas, thereby building a strong health and safety conscious business culture.
2. We are fully committed to the on-going compliance, maintenance and continual improvement of an efficient and effective Health and Safety Management System based upon the latest ISO 45001 Standard from where we apply the principles for a safe working environment to be able to minimize risks, diseases and dangerous activities as far as practically possible. This is achieved by implementing and maintaining efficient and safe working conditions and practices which are documented, managed, maintained, reviewed and monitored to continually improve thereby ensuring that health and safety requirements are met in full and are maintained at a consistent high level.
3. We communicate, provide training, create awareness and continually improve the development of our corporate culture which is to always act in a safe and responsible manner. All stakeholders are included in consultation on matters affecting their health and safety and are responsible for understanding and complying with the general safety requirements and operating responsibilities by taking caution, ensure safe handling and use of hazardous substances and dangerous goods, wearing PPE when required, reporting all accidents and incidents or unsafe acts thereby mitigating and preventing accidents and incidents under all normal operating conditions.
4. Our management team establishes, monitors at frequent intervals, reviews and communicates our health and safety objectives and targets to all stakeholders and external parties in keeping with this policy statement and maintaining their pertinence to our current business requirements.
5. We meet or exceed State, Federal and other compliance obligations that is applicable to the company including other initiatives to which we subscribe such as industry specific standards and specifications.

B. Ryan
Managing Director
